Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Applicant's election without traverse of the species of Fig. 15, claims 4-7, 10-12, and 14, in the reply filed on 1/26/06 has been acknowledged. Claims 8 and 9 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 1/26/06.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 4-7 and 14-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 2002/0066817 in view of JP 2003-19945. US '817 discloses an apparatus having substantially all the claimed features including "shaft member" 11, plate fitting member 12, and plate member 14. it is deemed that the member 12 has an end portion disposed inside the cylinder member 10 where it engages the torsion shaft 11 as shown analogously by the engagement between torsion shaft 12 and member 15 of JP '945 or, alternatively, that member 12 has an end portion inside the cylinder member as shown by JP '945 would have been obvious to a person having ordinary skill in the art to obtain compactness by shortening the overall axial length. It should be noted that in an emergency situation, the end 16 of element 14 initially approaches the other end; the end 16 moves counter-clockwise as seen in fig. 1 which is in a direction approaching the other end. Fig. 1 also shows overlapping (claim 15). Both ends are curved, i.e. "turning portion" (claim 16). When the plate member 14 is deformed, it goes from

bending radially outwardly to bending radially inwardly as it goes through resistance path 18 (fig. 1), therefore "changing orientation.. in a direction opposite" (claim 17).

Claims 10-13 are allowed.

Applicant's arguments filed 6/1/06 have been fully considered but they are not persuasive. See rejection above.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
